To the Trade:

It is again our pleasure to present for your consideration, this *1941 Trade List*, devoted exclusively to Selected Strains of Flower Seeds—suitable for the most critical Florist Trade.

Our policy during the past eight years has always been directed towards supplying our many customers with Seeds of Dependable Quality—the foundation of permanent success, and which has done so much to establish our position in the horticultural industry. And this specification, so vitally important to the Florist Grower, is reflected in our seed stocks obtained from only the most reputable growers throughout the World.

You will agree, we believe, that our prices are reasonable and consistent with seeds of the highest quality; and that there is nothing so expensive as cheap, poorly grown, flower seeds.

We welcome the opportunity to thank our patrons for their generous support in the past and will do our utmost to justify its continuance. We shall constantly strive to merit your repeat orders.

NEW FLOWER CREATIONS and SPECIALTIES for 1941

AGERATUM "MIDGET BLUE." (Silver Medal A. A. S. 1938.) A very fine dwarf Ageratum growing not more than 2-3 inches high with delicate fine foliage, which is practically smothered with small true Ageratum Blue flowers. Really the first dwarf Ageratum that will come uniformly dwarf and true to color from seed. Tr. Pkt., 35c; $\frac{1}{8}$ oz., \$1.25; $\frac{1}{4}$ oz., \$2.00

ALYSSUM DWARF COMPACT VIOLET QUEEN. A very pretty bright violet, much deeper than Lilac Queen, quite distinct in both color and habit. A fine companion for Little Gem.

Tr. Pkt., 20c; $\frac{1}{4}$ oz., 35c; 1 oz., \$1.20

ASTER BRANCHING "JEAN BOYD." (Bronze Medal A. A. S. 1940). It is early blooming, coming into flower about the same time as the Royal type, richer in scarlet-red color than Heart of France. Plants are base branching and extremely floriferous, they grow about 20 inches high and the Crego type of bloom measures from 2 $\frac{1}{4}$ -2 $\frac{1}{2}$ inches in diameter. Recommended for garden and cut flower use, flowers are of long-lasting quality when cut.

Tr. Pkt., 35c; $\frac{1}{4}$ oz., \$1.00

ASTER EARLY GIANT WILT RESISTANT. The finest large flowered, heavy stemmed wilt resistant Aster yet developed. Flowers are of the large Giants of California type, while the plants are less tall, about 1 $\frac{1}{2}$ ft. in height, with strong heavy stems. This class is early blooming, coming into flower 4-6 weeks earlier than the Giants of California, that is during early to mid August. An exceptionally new class.

LIGHT BLUE. (Silver Medal A. A. S. 1939.)

PEACH BLOSSOM, opens white, flushes lavender-pink.

ROSE MARIE. (Honorable Mention A. A. S. 1940.) A rich lively shade of rose pink.

Tr. Pkt., (each) 35c; $\frac{1}{4}$ oz., 75c

COSMOS EXTRA EARLY DOUBLE SENSATION MIXED. Coming in colors of white, pink and crimson, this new double Cosmos is similar to the single Sensation in height and other habit characteristics. Two forms of double flowers are found in this new group and both will average between 4 $\frac{1}{2}$ and 5 inches across—the regular double crested and the newer and novel fluted types. Equally as large as the single Sensation, the new double crested type will produce a large 2 inch crested center—which makes it appear even more mammoth. The fluted flowers are most informal of the two, as they bloom in a variety of shapes and forms. Most common is the type with 15-20 extra petals growing out from the yellow center. It also is not unusual to see a plant with the petals of each flower shaped like a trumpet. Seed of this novelty is all handpicked from double plants only, therefore the doubles percentage runs higher than the smaller flowered double crested Cosmos.

Tr. Pkt., 35c; $\frac{1}{4}$ oz., \$1.25; 1 oz., \$4.50

DAISY Shasta (Diener's Varieties)

G. MARCONI. Flowers the year around in semi-tropical climates and will also endure zero climates. An ALL-DOUBLE EVERFLOWERING variety which has flowers of 5 inches in diameter on 30 inch stems, very showy..... Tr. Pkt., 50c; 6 packets, \$2.50

NEW SINGLE BROAD-PETALED. Long wiry stems, flowers of 8 inches in diameter, the earliest single, Shasta Daisy to flower in the spring.

Tr. Pkt., 50c; 1/16 oz., \$1.25; $\frac{1}{8}$ oz., \$2.25

ALL-DOUBLE RESELECTED. Very large flowers resembling Giant Asters.

Tr. Pkt., 50c; 1/16 oz., \$1.25; $\frac{1}{8}$ oz., \$2.25

HOLLYHOCK ANNUAL "INDIAN SPRING." (Silver Medal A. A. S. 1939.) "Indian Spring" blooms in less than 5 months after seed is sown. A profuse bloomer. After the first bloom is past, if the plants are cut back they will produce a second crop of blooms the same season. Flowers are of attractive bright rose and rosy carmine shades. Normally 3 $\frac{1}{2}$ to 4 feet tall, plants may grow as high as 6 feet in some sections.

CYNOGLOSSUM (Chinese Forget-Me-Not)

CYNOGLOSSUM AMABILE COMPACTUM "FIRMAMENT"

(Awarded Bronze Medal by
"All America" Council)

This is a welcome new dwarf type of Chinese forget-me-not, selected from a mutation out of *C. amabile* Fairy Blue. Trial reports show it is true and uniform stock. Fifteen to eighteen inches tall and bushy, and of rich blue color, always in garden demand. It should prove the most popular of all *cynoglossums*. Its growth allows it to be planted with the pink variety, which likewise does not grow so weedy or rank as *C. amabile*. It is about the easiest thing to grow among flowers and should prove a garden favorite. It can also be used as cut flower material.

MARIGOLD

Marigold Early Dixie Sunrise

MARIGOLD EARLY DIXIE SUNRISE (Award of Merit by "All America" Council)

Some years ago the Land of Dixie gave us Marigold Dixie Sunshine, a very desirable but unfortunately late blooming variety. Now, far from the Land of Dixie, from Canada in the North, the land of the rising sun, comes Marigold Sunrise, an early blooming form of Dixie Sunshine. The flowers are large and ball-shaped, ingeniously composed of dozens of tiny five-petaled florets, gracefully interlocking, daintily fringed in effect. The color is brilliant golden yellow, a ray of dazzling pure beauty. Of particular interest is the fact that Sunrise comes 100% fully double and blooming commences by August 15, assuring its adaptability to any locality. The plants are tall, bushy, heavily covered with the colorful blooms and remain in flower over a long period.

SCABIOSA IMPERIAL GIANTS**"Blue Moon"**

Honorable Mention, All-America Council

The flower form of this new Scabiosa is as different from the existent Scabiosa varieties as Dahlia Flowered Zinnia differs from the old Zinnia types. This new type has flowers composed entirely of broad, heavy, wavy petals, eliminating the pincushion center entirely. In other words, the flower is literally fully double. **Blue Moon** is an ideal cutting type, because of the stem length, fully 27" even when field grown, and especially because the large beautifully shaped flowers are a luscious shade of deep lavender blue so hard to find in annual flowers.
